Dear Mr. Conrad

This is in response to your letter dated December 22, 1992, requesting additional information on the Defense Contract Action Data System (DCADS) data for fiscal years 1976 through 1985, and provides answers to the problems you described.

Enclosure 1 contains a general overview of the data, which may aid you in your understanding of the data. Enclosure 2 contains your list of problems encountered for each of the fiscal years and answers, or information about where to find answers to the questions you stated. Enclosure 3 provides additional footnoted information about the data for each of the fiscal years, and is intended to explain the code changes that may have occurred from fiscal year to fiscal year within one of the five DCADS data formats. Finally, Enclosure 4 contains a record layout of the ZARK locator and contractor files, and is intended to provide answers to the many questions you had concerning the ZARK data.

If I may be of further assistance, please let me know. My point of contact concerning this matter is Mr. Russell Daul, who may be reached at (703) 746-0786.

Enclosures:  
As stated

Purchasing Office Codes

1. Prior to calendar year (CY) 1980, the source document for the purchasing offices was the DOD Procurement Coding Manual (4105.61M), Volume III, "DoD Purchasing Offices," which was available from each of the Military Departments and the Defense Logistics Agency. Please see the enclosed list (Attachment 1). Then, beginning in CY 1980, the Directorate for Information Operations and Reports (DIOR) began to publish its own source document for the purchasing offices. The document's title is Department of Defense Defense Acquisition Management Data System Purchasing Offices List (MN01). The oldest version of this document available within the Directorate for Information Operations and Reports (DIOR) was published in CY 1985, and was provided to you previously.

2. Prior to fiscal year (FY) 1979, four characters were used to represent the purchasing offices. In FY 1979, the Navy began to use five characters to represent their purchasing offices; therefore, in FY 1979, the field size was also expanded to five positions. Then, in FY 1984, an additional position was added. The additional position (or first position) was used to represent the department or service. The field became known as the POFKEY, or purchasing office key.

Additional Fields

Additional fields were also added in FY 1984, such as the LPLAKEY and LPARTKEY. The LPLAKEY and LPARTKEY were based on the Federal Information Processing Standard (FIPS) 55-2 publication, which is administered by the Department of the Interior, United States (U.S.) Geological Survey. The code contains information on each place located in the U.S. and the U.S. outlying areas. The first two positions represent the state, and the remaining five positions represent the city. The LPLAKEY is a code which represents each unique place, and the LPARTKEY is a code which is macro to the LPLAKEY, and represents one or more places. For example, the Pentagon is a place, but it is part of Arlington which represents one or more places. Therefore, the place name in the file would be for Arlington, and not the Pentagon (Attachment 2).

DD Form 1057 Data

Beginning in FY 1984, files began to contain summary, DD Form 1057 data; this may help explain why some of the fields are blank where you are expecting coded information. The IDKEY for the DD Form 1057 data contains all zeroes.

ZARK vs. DUNS

The FY 1983 file contains both ZARK codes and Dun and Bradstreet (D&B) numbers (DUNS) information; however, in FY 1983, the DUNS were optional and we did not officially begin collecting this information until FY 1984. Also,

until FY 1984, the contractor name used in the files was based on the name contained in the ZARK contractor file; however, beginning in FY 1984, the contractor name in the file was based on DUNS file. Also, it is important to note that the DUNS name is always the headquarters name (and not the establishment name), and that the DUNS information is proprietary - only available from D&B. Therefore, to obtain such information, we suggest that you contact D&B directly at the following:

#### LSA Region Codes

DIOR stopped using LSA region codes in FY 1984. The first position of the Labor Surplus Area (LSA) region code is explained in the Defense Acquisition Management Data System (DAMDS) Code Translation Manual for Computer Listings (FYs 1976 through 1978) or Defense Acquisition Management Data System (DAMDS) Code Translation Manual (FYs 1979 through 1983). Positions two and three identify a specific LSA within the state. No further LSA information is available within DIOR. To obtain such information, we suggest you contact the following individuals at the U.S. Department of Labor: Mr. Bill Mc Garrity at (202) 219-5185 or Mr. Doug Mc Culley (202) 219-4336.

#### Dollar Value Field

The Dollar value fields in the DCADS datasets contain signed data. If the right-most position of the field contains a number (0-9) or a letter (A-I), the dollar value is positive. The "A" represents the positive number 1; "I" represents the positive number 9; positive zero is always 0. However, if the right-most position of the field contains a letter (J-R) or the left bracket symbol ")," the dollar value is negative. The "J" represents the negative number 1; "R" represents the negative number 9; the negative zero is the ")" symbol.

#### Fiscal Year Conversion

Between FYs 1976 and 1977, the Government's fiscal year changed from July 1 - June 30 to October 1 - September 30. At the time, 76 was the code used to represent the data for the July to June timeframe, and 7T was the code used to represent the data for October to September timeframe.

Dataset Structures

There appears to be some confusion as to which DCADS data pertains to which dataset formats. There were only five formats for the fiscal year time periods in question (1976 through 1985). The 1976 dataset format (DCADS76.XLS as you call it) pertains to DCADS data from FY 1976 through FY 1978; the 1979 dataset format (DCADS79.XLS) pertains to DCADS data from FY 1979 through FY 1982; the 1983 dataset format (DCADS83.XLS) pertains only to DCADS data for FY 1983; the 1984 dataset format (DCADS84.XLS) pertains only to DCADS data for FY 1984; and finally, the 1985 dataset format (DCADS85.XLS) pertains only to the DCADS data for FY 1985. Please also see Enclosure 3 for more detailed information concerning the differences among the fields of the DCADS data from fiscal year to fiscal year within a given DCADS dataset format.

---

NOTE: CATEGORY "A" CODES ARE TO BE USED FOR R&D TRANS-  
ACTIONS ONLY.

SECTION I - CODING FOR ITEM 10A OF DD FORM 350

(FEDERAL SUPPLY CLASS OR SERVICE CODE)

GENERAL. A four-digit code, as provided by this Section I, shall be entered in Item 10A of every procurement action reported on DD Form 350. Only one code number shall be entered. If more than one code is applicable, enter the code which describes the predominant product or service procured (see also DARS 21-116).

If the action is for research, development, test, or evaluation work (RDT&E), enter a code from Part A of this section. RDT&E is defined in DARS 4-101. Do not assign a RDT&E code to supplies or housekeeping services purchased in support of "in-house" research or development work; such supplies are coded in accordance with Part C of Section I and the services in accordance with Part B. Procurement personnel responsible for coding RDT&E actions shall obtain sufficient information from requisitioning personnel to permit accurate classification in accordance with Part A.

If the action is for services other than RDT&E work, enter a code from Part B of Section I, and if it is for supplies, enter a code from Part C.

## PART A - RESEARCH, DEVELOPMENT, TEST, AND EVALUATION (RDT&E)

PURPOSE. The DD Form 350 codes in this part have been revised to coincide with the guidelines established by the Federal Procurement Data Center. Previous editions of this manual contained a separate section for each of the departments. Beginning with fiscal year 1979, Section IA is applicable to all DoD purchasing offices.

DESCRIPTION. The RDT&E code is composed of two alphabetical and two numeric digits. The first digit is always the letter "A" to identify RDT&E; the second digit is alphabetic "A to Z" to identify the major category; the third digit is numeric 0 to 9 to identify a subdivision of the major category; and the fourth digit will be numeric 1 to 6 to identify the type of RDT&E, and will be assigned by the contracting officer in accordance with DARS 4-101 as follows.

1st Two Positions of Program Element	Fourth Position of Item 10A Code on DD Form 350	DARS 4-101
61	1. Research	(1)
62	2. Exploratory Development	(2)
63	3. Advanced Development	(3)
64	4. Engineering Development	(4)
All Other	5. Operational Systems Development	(5)
65	6. Management & Support	(6)

When the program element number appears on the purchase document, the first two digits of this element number will determine the number to be used in the fourth position.

FOR ARMY, the third digit of Army budget activity codes beginning with 6 identifies the appropriate code for use in the fourth position. Code 5 will be entered in the fourth position for all Army budget activity codes beginning with other than 6.

When completing this item, the precise service being purchased shall be coded. Example: A contract for research on noise pollution for aircraft shall be shown under environment (AH4\*) for noise pollution, and not under aircraft.

To ensure that the contract is for RDT&E, check the appropriation symbol. (Do not include housekeeping supplies or services in support of in-house RDT&E even though a RDT&E appropriation symbol is cited.) The following symbols are currently applicable:

ARMY 21X2040  
NAVY 17X1319  
NASA 80X0108

AIR FORCE 57X3600  
DARPA 97X0400.13

## FOREWORD

The Directorate for Information Operations and Reports (DIOR) maintains the Defense Acquisition Management Data System (DAMDS), which is developed from data submitted by components of the Department of Defense (DOD) on all contract actions over \$10,000. These data are available on computer listings which have been sorted either by contractor name (alphabetical) or by place of performance (geographic).

The first line of each entry (Line 1) identifies the contractor and the place of performance and provides the associated contractor, city, and state or foreign country codes. Data on each individual award to that contractor are then displayed on a single line (Line 2). A summary of the Line 2 column headings, the data elements shown in each column, and the page in this manual on which each is explained begins on page ii.

This manual is intended to assist the user of these computer listings in understanding the range of data presented. While the meanings of many of the codes used in the listings are provided here, not all codes have been explained. Where applicable, references have been provided which identify other manuals and/or regulations that the reader may find useful. These publications include the *DOD Procurement Coding Manual; Volumes I, II, and III* (DOD Publication No. 4105.61M) and Sections XX and XXI and Appendix N of the *Defense Acquisition Regulation (DAR)*.

For further assistance in interpreting the data contained in these listings, contact DIOR's Special Projects Division at (202) 695-6815 (Room 1C535, The Pentagon, Washington, D.C., 20301).
