Key to Element Descriptions

ELEMENT KEY

ElementNo: Two-place identifier. The first place identifies the logical grouping to which the element belongs. The second place is a serial alpha identifier. Groupings include:
1. Contract Identification Information
2. Dates
3. Dollar Values
4. Purchaser Information
5. Contract Marketing Data
6. Contract Information
7. Legislative Mandates
8. Product or Service Information
9. Entity Data
10. Competition Information
11. Preference Programs
12. Transaction Information
13. Entity Data

For elements that are not in the baseline because they have been merged into other elements, the element number is the same as the element into which it has been merged.

Name: Text name of element.

DEName: Table name of element.

Screen Name: Actual Label on the screen.

XML Tag Name: Actual Tag found in the XML XSD schema.

XML Version: Version of the XML schema.

Derivation: If the element is derived, this field describes how. Formulas for calculated values are shown here.

Definition: Brief definition of the element.

Instruction: How the source enters the data.

FAR/DFARS: Reference to applicable FAR and/or DFARS (Blank means none).

SF279: FPDS Item Number(s) from SF279 that are associated with the element (Blank means none).

DD350: DoD Item Number(s) from DD350 that are associated with the element (Blank means none).

Source: Contracting Officer (CO), FPDS if derived, or name of machine interface that supplies the data such as SAM (System for Award Management) or D&B.

Format: Data Type/ Format of the input for the element. The following is the list of data types/ format supported by FPDS

- String: String format can contain alpha numeric characters and spaces
- Integer: Numeric values
- Currency: Numeric (Dollar Value, optionalyy allowing $ symbol, and comma
- Date: Date values

Interfaces	Format	Sample Valid Values
XML	YYYY-MM-DD hh:mm:ss	2005-05-27 12:35:45
Web Portal/ GUI	MM/DD/YYYY	05/27/2005

- Boolean: True/ False

Interfaces	Format	Valid Values
XML	Boolean	True, False, 0, 1
Web Portal/ GUI	Check box	Checked state means true, unchecked state means false

Length: Number of positions. If variable, then the maximum number of characters is given.

NOTE: This Data Dictionary applies to all V 1.5 documents irrespective of the Date Signed on the base award actions.

Requirement State   Required – Input is required for the data element from all agencies.

(both Civilian and DoD):   Optional – Input may be required for the data element from all agencies based on certain contractual conditions.

Not Applicable – Input is not allowed from any agency as the data element does not apply. The value is neither system generated nor is propagated from the referenced IDV or the base record.

Propagates – Input is not allowed for the data element from any agency. The value is propagated either from the referenced IDV or from the base record.

Propagates/Required – Under normal conditions, the value will be propagated from the referenced IDV. However, under certain special conditions, the value will be required.

System Generated – Input is not allowed for the data element from any agency. The value is system generated.

Future Use – Currently FPDS is not collecting data for this data element. This data element is for future use.

Access Restricted: Yes = Field is encrypted or has restrictions on who can view and manipulate.

Values: Descriptions of codes that can be entered into coded fields (Metadata). Codes superscripted by DoD - codes that are valid only for DoD agencies; Codes superscripted by Civ - codes that are valid only for Civilian agencies.

FPDS Legacy: Provides history of the element and decisions made about the element by the PEC, the Re-Engineering Program Office, and the Interagency Working Group.

Notes: Observations about certain elements.

Derivation:	None
Definition:	The completion date of the base contract plus options that have been exercised.
Instruction:	Report the contract completion date based on the schedule in the contract. For an initial award, report the scheduled completion date for the base contract and for any options exercised at time of award. For modifications that exercise options or that shorten (such as termination) or extend the contract period of performance, report the revised scheduled completion date for the base contract including exercised options. If the award is solely for the purchase of supplies to be delivered, the completion date should correspond to the latest delivery date on the base contract and any exercised options. DO NOT change the completion date to reflect a closeout date.

XML Tag Name:	multiYearContract
XML Version:	Version 1.0 and later; Changed the data element type from Boolean to String in Version 1.3
Derivation:	The base document propagates the value to the orders and to all the modifications
Definition:	A multi-year contract means a contract for the purchase of supplies or services for more than 1, but not more than 5, program years. Such contracts are issued under specific congressional authority for specific programs. A multi-year contract may provide that performance under the contract during the second and subsequent years of the contract is contingent upon the appropriation of funds, and (if it does so provide) may provide for a cancellation payment to be made to the entity if appropriations are not made. The key distinguishing difference between multi-year contracts and multiple year contracts is that multi-year contracts buy more than 1 year of requirement (of a product or service) without establishing and having to exercise an option for each program year after the first.

6D   Type of IDC

ElementNo: 6D

Name: Type of IDC

DEName: Type_Of_IDC

Screen Name: Type of IDC

XML Tag Name: typeOfIDC

XML Version: Version 1.0 and later

Derivation: None

Definition: Identifies whether the IDC or Multi-Agency Contract is Indefinite Delivery/Requirements, Indefinite Delivery/Indefinite Quantity, or Indefinite Delivery/Definite Quantity. A requirements contract provides for filling all actual purchase requirements of designated Government activities for supplies or services during a specified contract period, with deliveries or performance to be scheduled by placing orders with the entity. A Requirements IDC or Multi-Agency Contract is a contract for all of the agency's requirement for the supplies or services specified, and effective for the period stated, in the IDC or Multi-Agency Contract. After award, the contract is a mandatory source for the agency for the supplies or services specified. The quantities of supplies or services specified in the IDC or Multi-Agency Contract are estimates only and are not purchased by this contract. Except as this contract may otherwise provide, if the Government's requirements do not result in orders in the quantities described as "estimated" or "maximum" in the Schedule, that fact shall not constitute the basis for an equitable price adjustment. An indefinite-quantity contract provides for an indefinite quantity, within stated limits, of supplies or services during a fixed period. The Government places orders for individual requirements. Quantity limits may be stated as number of units or as dollar values. An Indefinite-Quantity is a contract for the supplies or services specified, and effective for the period stated, in the IDC or Multi-Agency Contract. The quantities of supplies and services specified in the IDC or Multi-Agency Contract are estimates only and are not purchased by this contract. A definite-quantity contract provides for delivery of a definite quantity of specific supplies or services for a fixed period, with deliveries or performance to be scheduled at designated locations upon order. A Definite Quantity IDC or Multi-Agency Contract is a definite-quantity, indefinite-delivery contract for the supplies or services specified, and effective for the period stated, in the IDC or Multi-Agency Contract.

Definition: For Services: The predominant place of performance at the time of award. Predominance is based on funding. If funds are equal, Contracting Officers (COs) should use their best judgement. - In the case of subscription services, software licenses, or similar type services; use the location where these services are being used. - In the case of services that begin in one location and end in another (e.g., shipping); use the destination. - In the case of services being performed in oceans/seas, choose the closest major city (if in U.S. waters). In another country's waters, choose that country. If in open waters, choose the closest country and choose the closest major city if that country is the U.S. - In the case of services

being performed in the atmosphere or space, choose the location from which the equipment conducting the services was launched. - If the place of performance is not specified by the government in the Statement of Work or Performance Work Statement, and the CO does not have any other information indicating a specific location, the CO may use the entity's location as the place of performance. For Goods/Supplies: Items being manufactured should reflect the manufacture site as the place of performance. All other goods should enter the location the item was taken from inventory (e.g., the store location, etc.). - If the place of performance is located in the U.S. in an area that has no ZIP Plus 4 code (e.g., a national park, a remote location, etc.), use the closest location that does have a ZIP Plus 4. NOTE: Not all procurements require documentation of the place of performance in the file.

1. Required: Input is required for the data element from all agencies.

2. Optional: Input may be required for the data element from all agencies based on certain contractual conditions

3. Not Applicable: Input is not allowed from any agency as the data element does not apply. The value is neither system generated nor is propagated from the referenced IDV or the base record.

4. Propagates: Input is not allowed for the data element from any agency. The value is propagated either from the referenced IDV or from the base record.

5. System Generated: Input is not allowed for the data element from any agency. The value is system generated.

6. Future Use: Currently FPDS is not collecting data for this data element. This data element is for future use.

7. CO denotes Contracting Officer manual input or input from Agency Contract Writing System or Agency Procurement System.

8. Use element number to locate the definition in the Data Dictionary.

9. Source FPDS means that the element is system generated.

10. * Denotes DoD only.

11. When loading a BPA under an FSS, the Referenced PIID gets the PIID of the FSS. When making a BPA call against a BPA, the Referenced PIID gets the PIID of the BPA regardless of whether the BPA is stand-alone or under an FSS.

12. Requirement State for MOD, for all elements except 'Reason For Modification', actually depends upon it's base document type and not just limited to AWARD/IDV. i.e. If the MOD requirement state displayed 'Required', hence the field should be open on screen and It would be required for any one or more document type but not necessarily all.
